

25GBRM

The 25GBRM non-penetrating roof mount, is designed to support 25G tower sections. The mount is able to support 2 sections of 25G tower in a self supporting application. The base of mount is 10' square with a 16" tray to fit the concrete blocks, typically used as ballast. The mount is galvanized for corrosion protection and goes together quickly.

Use (1) optional BRM6PAD for a protective barrier between the mount and the roof.
