Step 2: Through bolting the mount bracket

Step 3: Connecting the base seat to the mounting bracket

Step 4: Clamping the mounting bracket to the desk

### Step 1

Before starting, lay out all parts to your mount and match them to the parts list provided. Verify that you have all your parts before attempting to assemble the mount.

#### Through bolting the LCD-2

### Step 2

Mark the desk or desired mounting surface in preparation of installation of the mounting bracket (1). Drill a 1/2" hole through the desired mounting surface. Place a plastic washer (7) on either side of the drilled hole and place metal washers (9) on top of the plastic washers (7). Insert the M10 screw (8) through the bottom most metal washer (9) through to the top most metal washer (9). Place the mounting bracket (1) onto the M10 screw and use nylon nut (11) and washer (10) to secure in place. **Warning: Please verify that your mounting surface will support the combined weight of your mount, mounting hardware, and monitor. Also verify that the mounting surface is safe to drill through. If in doubt, please contact a professional installer.**

Proceed to step 5.

#### Clamping the LCD-2

### Step 3

Make sure the flat head screw (5) is connecting the mounting bracket (1) to the base seat (2) with a plastic washer (7) in between. Use the nylon nut (11) and washer (10) to secure the mounting bracket (1). **Note: The mount may come assembled with the button cap M10 screw (8) attaching the base seat please make sure to attach the flat head screw instead.**

### Step 4

Place the clamp on the edge of the desk or mounting surface and turn the adjustable bolt (3) until the fixed plate on the adjustable bolt (3) is tight against the bottom of the desk or desired mounting surface. **Warning: Please verify that your mounting surface will support the combined weight of your mount, mounting hardware, and monitor. If in doubt, please contact a professional installer.**

### Step 5

Determine if whether your monitor has a VESA 100 or VESA 75 hole pattern. If the monitor has a VESA 75 hole pattern skip this step. Attach the VESA 100 plate to the back of your monitor using the M4 or M5 screws (12) or (13) as appropriate for your monitor.

### Step 6

Attach either the VESA 100 plate or your monitor to the VESA 75 holes using the 6mm long M4 screws if you are attaching the VESA 100 plate or the 12mm long M4 or M5 screws (12) or (13) if you are attaching the monitor directly.

### Step 7

*Please verify that all nuts and screws are tight.*

*Step 5: Attaching the VESA 100 plate to the monitor*

*Step 6: Attaching the VESA 100 plate or monitor to the mounting bracket*

## Enjoy Your Mount!

**WARNING:** *The installer of these products must verify that the mounting surface, ceiling or wall, will safely support the combined weight of all attached equipment and hardware. Video Mount products will not be held liable for the improper use or installation of its products.*
